FLUORIDE VARNISH IN A NEW DIMENSION

Profisil® Fluoride Varnish contains **5% sodium fluoride** (22,600 ppm) in a mucosa-friendly gel with a pleasant taste.

The **unique dimethicone gel base** adheres securely to the tooth surface for several hours, releasing fluoride ions for up to 24 hours.

More infos in a study →

THIS IS SPECIAL ABOUT PROFISIL®

- Adheres immediately and securely to the tooth surface for several hours
» thanks to the **unique dimethicone gel base**
- Easy to apply while providing optimal adhesion to the tooth
- Suitable for all age groups, including children with milk teeth
- Transparent and colorless after application, for optimal esthetics

WHAT **YOU** WILL LOVE ABOUT PROFISIL®

- No prior drying of teeth necessary
- Adheres instantly and doesn't drip
- Can be applied in any direction and reaches all areas
- No solvent » no clumping or drying out
- A single dose is sufficient for treating all teeth in both dental arches

PLEASANTLY PROTECTED WITH **PROFISIL®** FLUORIDE VARNISH

**PROFISIL®
